DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 11-269031.

JP '031 discloses a sheet cosmetic which is transparent, comprising an aqueous gel sheet, wherein the sheet have a thickness of 0.1-3 mm. JP '031 discloses a physiologically active component, water, a humectant, and a water-soluble polymer (i.e. hyaluronic acid).

JP '031 does not teach the particular properties of having a gel strength nor an adhesion force.

However, absence of evidence to the contrary, there are no unexpected results, since the JP '031 reference discloses that the cosmetic sheet have the high adhesion force to the skin and also excellent moisturizing effects to the skin.

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is
